Helping Good Businesses Become Better

Nebraska Business Development Center provides financial analysis, marketing analysis and operations advice to more than 2,500 Nebraska businesses each year. We help business owners, entrepreneurs and researchers develop business plans, strategic plans and marketing plans. We package and place commercial loans. We identify potential customers for our clients. By helping Nebraska businesses start and grow, NBDC contributes to Nebraska’s high quality of living.

NBDC consultants are professional business advisers with academic and practical credentials. NBDC management consultants hold business degrees and the Economic Development Finance Professional (EDFP) certification from the National Development Council. NBDC has specialized certified consultants in government contracting, exporting, lean manufacturing, technology commercialization and sustainable business practice.

What does it cost? Start-up consulting services, loan packaging, and basic market planning services are provided to small businesses for free. Fees are associated with services to large businesses and services to small businesses that are more complex. These include management training, business valuation, advanced market research and exit planning. All NBDC services are confidential and impartial.

Who qualifies? Services are provided to Nebraska businesses and to those wishing to start a business in Nebraska.

Professional consulting services for the life cycle of your business

We focus our financial assistance on cash flow management and forecasting—integrating finance, marketing, and management into sound business plans. We are so successful at loan packaging that most of our client referrals are from commercial banks. NBDC consultants have professional credentials in business valuation.

We help our clients achieve higher sales through market research and analysis—including assistance pursuing government contracts and international sales opportunities.

Our specialists in sustainability and lean process engineering can help your company become safer, more efficient and more profitable.
